Funding opportunity: AI for climate resilience and environmental science

March 25, 2026

Google recently announced the Google.org Impact Challenge: AI for Science—a $30 million global open-call to accelerate scientific breakthroughs that improve human health and build climate resilience. Google is looking for nonprofits, academic institutions, and social enterprises that are building AI-powered solutions ranging from large-scale open datasets to pioneering research breakthroughs.

Applications are open until Apr. 17, 2026. Learn more.
