This month, we're featuring webinars about a new precision agriculture textbook, mixed cover crops in corn-soybean systems, and organic post-

harvest handling and food safety.

Precision agriculture 2.0 from sensors to soil health: new textbook release

Thursday, September 10, 11 am–12 pm CDT

Join us for a webinar exploring the second edition of *Precision Agriculture Basics*, a fully updated textbook covering the latest advances in the field.

Learn about key topics covered in the book.

Discover the ideas and strategies behind the newly updated *Precision Agriculture Basics*, straight from the authors.

*Presented by **David Clay**, Editor-in-Chief, American Society of Agronomy; and **Skye Brugler,** Research Associate I, South Dakota University.*

Mixed cover crops in corn-soybean systems: examining soil health, input efficiency and yield

Thursday, September 17, 11 am–12 pm CDT

Explore how mixed cover crop systems influence soil fertility and input efficiency in corn-soybean rotations.

Learn how to impact soil health and yield outcomes through species selection, blend composition, and management strategies.

Presented by *Dr. Trenton Roberts*, *Professor, Crop, Soil, and Environmental Sciences (CSES), University of Arkansas.*

Organic post-harvest handling and food safety

Tuesday, September 22, 11 am–12 pm CDT

Sara Runkel, M.S.

Explore best practices for post-harvest handling and food safety in organic systems.

Learn how to minimize chemical, physical, and biological hazards throughout the production and handling process, while maintaining compliance with organic regulations.

*Presented by **Sara Runkel, M.S.,** Local Food Program Director, Carolina Farm Stewardship Association.*
